

AMERICAN SOCIETY OF IRRIGATION CONSULTANTS
SOUTHERN CALIFORNIA CHAPTER
TECHNICAL MEETING NOTICE
Sub Surface Irrigation Systems

Bruce and Jason Hayes from Irrigation & Water Technologies will be our guest speakers.

In theory applying water sub surface seems to be the optimum solution for irrigation if in fact one wants to reduce water consumption. If you can apply water uniformly and directly to the root zone you eliminate evaporation and surface wetness that contributes to compaction, weed germination and runoff.

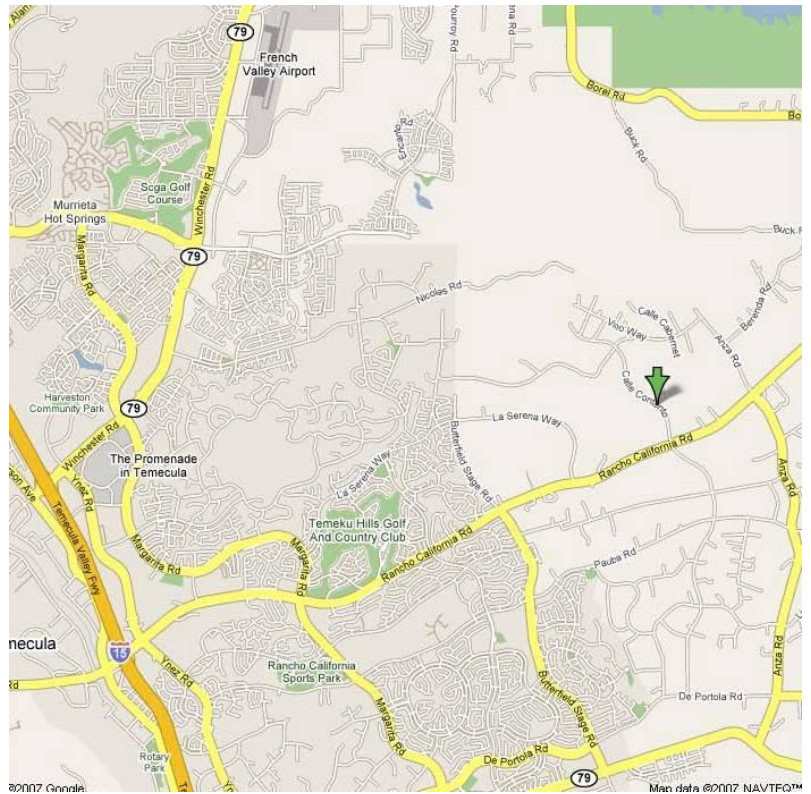

The SCI system takes advantage of the natural capillary action of the soil and applies water directly to the root zone. Capillary action varies widely in soils, thus tests were developed to map moisture movement and water holding capacity. The results will be discussed for various soil types as well as soil amendments to improve soil characteristics for irrigation.

WHERE:	Temecula, The Falkner Winery
DATE:	Thursday, Aug 6th
TIME:	5:30 PM – 9:00 PM
COST:	\$50 per ASIC member and non-member – Wine tasting/Dinner included

- ◆ [5:30pm](#) Wine Tasting, Networking
- ◆ [6:30pm](#) Dinner Buffet
- ◆ [7:30pm](#) Guest Speaker Presentation
- ◆ [8:30pm](#) Question and Answer

LOCATION:
Falkner Winery
40620 Calle Contento
Temecula, CA 92591
Main Phone: (951) 676-8231
